-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-24 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-24 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449) Paper No(s) 6,7.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6,8,11-13 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Adat et al. Adat et al. shows the use of an ergonomic support (1) comprising a guide rail (5) and archable pressure surface (13) having an upper and lower end, whereby one of the upper and lower is movably attached to the guide rail. A traction element (25) is engaged to slide an upper end of the archable pressure surface. Adat et al further shows the use of a weight distribution surface (49) is fixed to the pressure archable surface at an apex thereof.

3. Claims 1-8,11-13 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by van Hekken et al. van Hekken et al. shows the use of an ergonomic support comprising a guide rail (54) and archable pressure surface (58) having an upper and lower end, whereby one of the upper and lower is movably attached to the guide rail. A traction element (64) is engaged to slide a lower end of the archable pressure surface. van Hekken et al further shows the use of a weight distribution surface (32) is fixed to the pressure archable surface at an apex thereof.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3636

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7,9-10, and 14-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adat et al. Adat et al shows all of the teachings of the claimed invention except the weight distribution surface being made from metal having holes or ribbed. It would have been an obvious matter of design choice to modify the weight distribution surface of Adat et al., with holes or ribbed and made from metal, since applicant has not disclosed that a holes or ribbed weight distribution surface formed from metal solves any stated problem and it appears that the weight distribution surface of Adat et al. would perform equally well. Furthermore the method steps as recited would have been incorporated with the use of the invention, as taught by Adat et al.

6. Claims 9-10, and 14-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over van Hekken et al. Van Hekken et al. shows all of the teachings of the claimed invention except the weight distribution surface being having holes or ribbed. It would have been an obvious matter of design choice to modify the weight distribution surface of van Hekken et al., with holes or ribbed surface, since applicant has not disclosed that a holes or ribbed weight distribution surface solves any stated problem and it appears that the weight distribution surface of van Hekken et al. would perform equally well. Furthermore the method steps as recited would have been incorporated with the use of the invention, as taught by van Hekken et al.
